Detailed Description
Claims

English Abstract

A multimedia network (1) with connected customer stations (2), merchant servers (3), and a **payment** server (5). Secure electronic transactions are performed using a secure electronic transactions protocol (SET), including...

...performing said SET protocol and for managing said certificates for the customer station. A remote **customer agent** (13) represents the customer station in the negotiation and **payment** process. The customer station (2) comprises an agent interface (12), fit for transmission of codes, parameters and certificates between the **customer agent** (13) and the transactions management means (10). A remote **merchant agent** (14) represents the **merchant** station (3) in the negotiation and **payment** process with the **customer agent** (13) or the customer station (3), to have paid for the selected products in a...

Detailed Description

... to
perform the secure payment for it.

Each customer 2 may be represented by a **customer agent** (CA), while each merchant 3 may be represented by a **merchant agent** (MA). The negotiation process (presentation, selection and collection of products and the payments for the...

Based on patent WO 200139062

Abstract (Basic): WO 200139062 A1

NOVELTY - A **customer agent** (201), a **merchant agent** (200), an account manager (202) and a mediating trusted agent (203) are interconnected by an electronic communication network and the account manager administers customer accounts and trading records, while an account manager (204) administers the **merchant** accounts. The trusted agent checks the transaction during a trading session by sending a message to the **merchant agent** including a trading session identity and the customer identity and the trusted agent acknowledges a transaction after receiving and clearing the customer transaction record to the **merchant**.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are included for a method of payment for goods and services in an electronic commerce system and for a method for secure delivery of electronic products.

USE - Checking transactions for purchases made by customers from a **merchant** over the Internet.

ADVANTAGE - Maintaining customer anonymity while reducing

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
US 20030233305	A1	140	G06F-017/60	Provisional application	US 99162932

Provisional application US 2000250819

Abstract (Basic): US 20030233305 A1

NOVELTY - The system has a buyers inter-agent to receive information regarding a selected item from a **sellers** inter-agent (1015). A buyers input device identifies list of **sellers** of the item. The **seller agent** representing a **seller** of the item receives information from the **buyer agent** and the list of **sellers** is received by the **buyers agent**. The buyer and the **seller agent** engage in an exchange of information.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (a) a system for information collaboration between a buyer and a **seller** using computers that communicate over a distributed network
- (b) a method for information collaboration between a buyer and a **seller**
- (c) a method for exchanging information between a buyer and a **seller**
- (d) a computer program product comprising a machine readable medium provided with program instructions for performing a method for information collaboration between a buyer and a **seller**.

USE - Used for exchanging information between a buyer and a **seller** over a distributed computer network.

ADVANTAGE - The information exchange provides the buyer and the **seller** with a shorter learning curve in making and processing the transactions, as well as greater diversity of choice, thereby promoting increasingly fair and efficient transactions. The system allows the companies to minimize inventory by pre-selling before making them. Also the system creates, promotes and enhances competition among **sellers**, making the markets increasingly efficient for buyers.

DESCRIPTION OF DRAWING(S) - The drawing shows architecture of a cooperative communications network.

FEDERAL TRADE COMMISSION FINES MIAMI TELEMARKETER \$1 MILLION

(Owner of 4 Florida office-supply companies agrees to \$1 mil settlement of
Federal Trade Commission fraudulent business practices charges)

Miami Herald , p N/A

November 21, 1996

DOCUMENT TYPE: Regional Newspaper (United States)

LANGUAGE: English RECORD TYPE: Fulltext

WORD COUNT: 487

ABSTRACT:

...Business Supplies, Interstate Office Systems, Nationwide Office
Products, and Creative Business Consultants, has agreed to pay \$1 million
to settle Federal Trade Commission charges that his four companies tricked
consumers into...

...the four companies misled small business customers into believing that
they represented the customers' regular supplier. The agents then told
the customers that they had to get re-orders because of an unpaid balance
on a previous order. The agents threatened the customers with lawsuit
if they refused to order over-priced products, such as a \$169 toner...
...couple are in the business. According to the Business Products Industry
Association, "Copy Cat" scams account for at least \$50 million in annual
loses. Article provides other information on the commission...

...special key, and sends the encrypted product to the buyer, passing thee
key to the buyer's agent. The buyer's agent asks the consumer to
verify that he wishes to purchase the encrypted item.

After that is confirmed, the consumer sends payment to his trusted agent,
which passes it on, encrypted, to the merchant's trusted agent. At that
point, the decrypting keys are issued on both sides, so that the payment
and product are delivered at the same time, with finality. This trusted
agent paradigm also...
